

Prosser Creek Watershed Assessment

Beth Christman,
Director of Restoration

March 23, 2019

Watershed Assessment

- Evaluation of overall watershed condition
- Science-based: geology, hydrology, geomorphology, soils, vegetation, etc.
- Landowners voluntarily participate
- Guidance for future restoration and land management projects

Watershed Assessment does not

Does not:

- Regulate any land management activities
- Obligate or commit any land management activities

Goals of Watershed Assessment

- Address root causes of problems:
 - Uplands
 - Meadows
 - Streams
- Develop solutions based on root causes
- Build landowner relationships
- Attractive to funders for future projects

Examples of Watershed Assessments

- Donner Basin Assessment
- Coldstream Canyon Watershed Assessment
- Martis Watershed Assessment
- And more...

TRWC request to Tahoe Donner Association

- Willing participant in Prosser Creek Watershed Assessment
- Provide letter of support to Assessment funders
- Commit staff late 2019 through late 2021:
 - Launch meeting
 - Intermediate review meeting
 - Final review meeting
 - Review and approve assessment documents
