

Site Inspection Preparation Requirements

For All Projects with a Footprint Change

- Have your property pins marked and clearly exposed/dugout.
- Property lines must be strung. (Sides and Rear unless told otherwise by the ASO office or the Architectural Standards Committee).
- Have your address sign clearly visible (For new construction).
- Stake out the corners of the project. For new houses/garages and similar structures, all corners including pop outs as well as corners of decks. For all other projects stake out the outlines of the project.
- Flag all trees that will be removed as part of your project, they need to match you submitted site plan.
