

**May 8, 2019 - ASC Discussion Item: 2008-2 Committee Policy Resolution**

The committee discussed the resolution from 2008. The committee discussed the importance of consistency of the approval process. The committee discussed alternates are essentially interns to learn the processes before they can change to members. The committee also discussed the life cycle of permits, where it is an advantage for some committee members to see the start and close of a project with larger two year permits from preliminary review, submittal, and close of the project.
