TAHOE DONNER FORESTRY UPDATE

BOARD OF DIRECTORS MEETING JULY 27, 2019

Presentation Outcomes

Highlight the Association's commitment to provide resources towards reducing the fire hazard in the area and forest health management

Provide defensible space programs update

Priority Areas

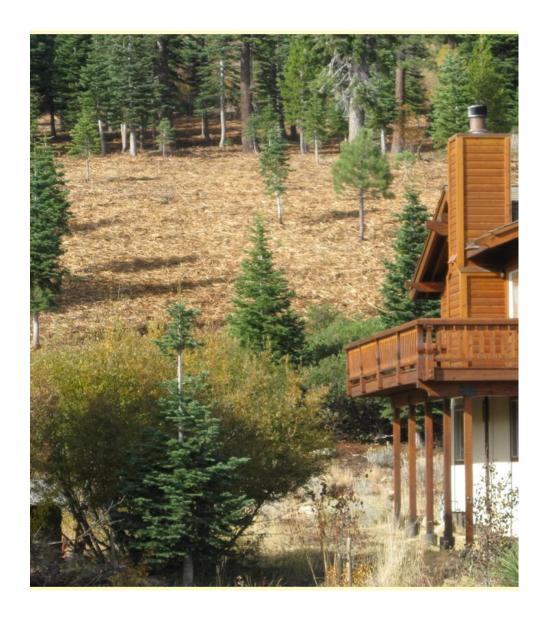

Create fuel reduction and forested zones within:

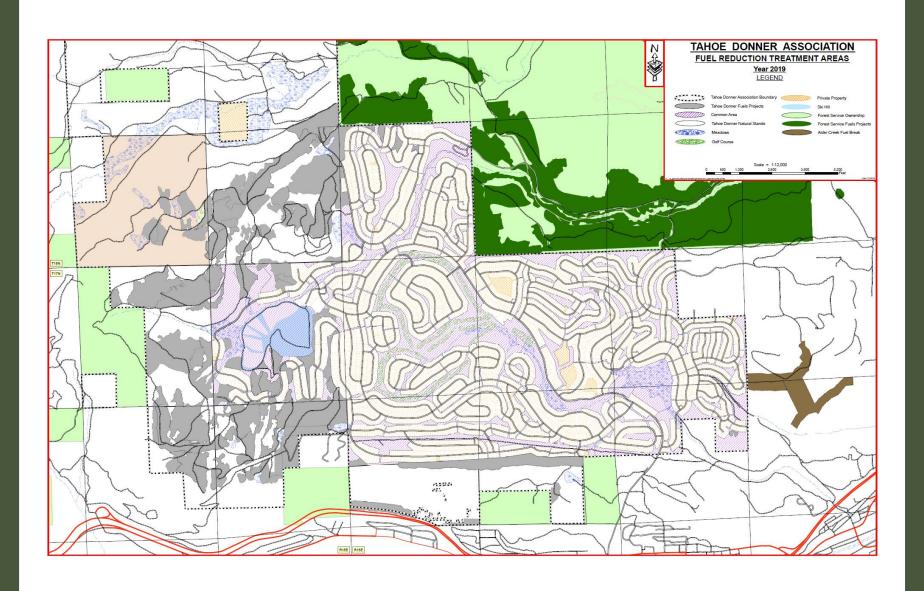

Areas around homes (common areas).

Southwestern border areas – prevailing winds out of the southwest.

Areas of suitable topography and soil type.

Areas along main access routes (system roads).

Fire Hazard Reduction Zones

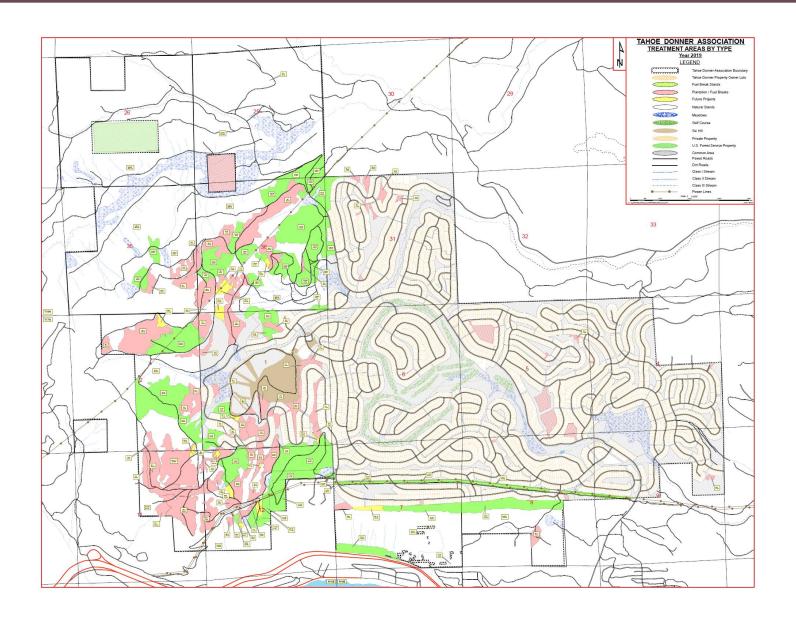

554 acres of reforestation/fuel breaks

637 acres of fuel reduction zones

1,338 acres of common area with approximately two-thirds for fuel reduction

2,487 acres of "natural stands"

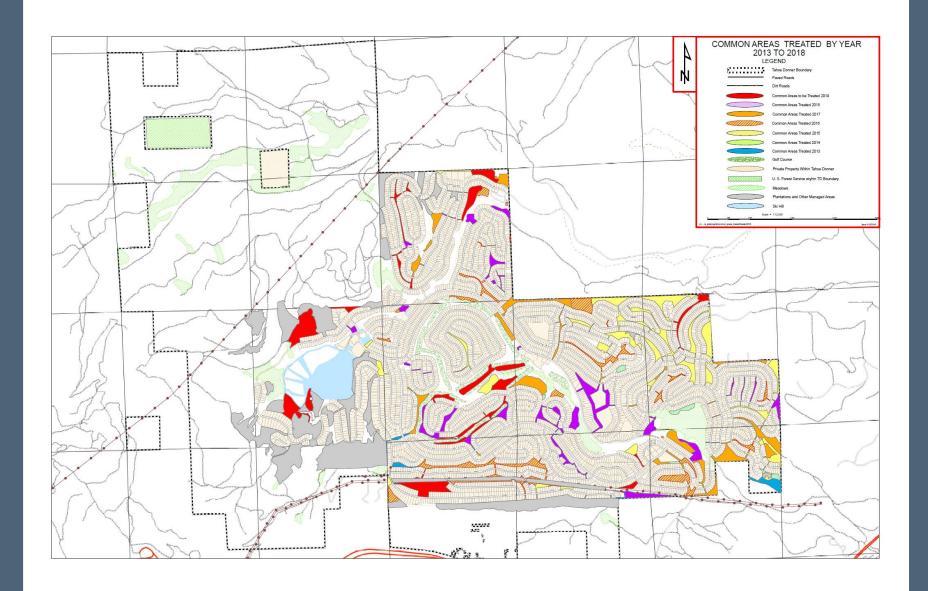

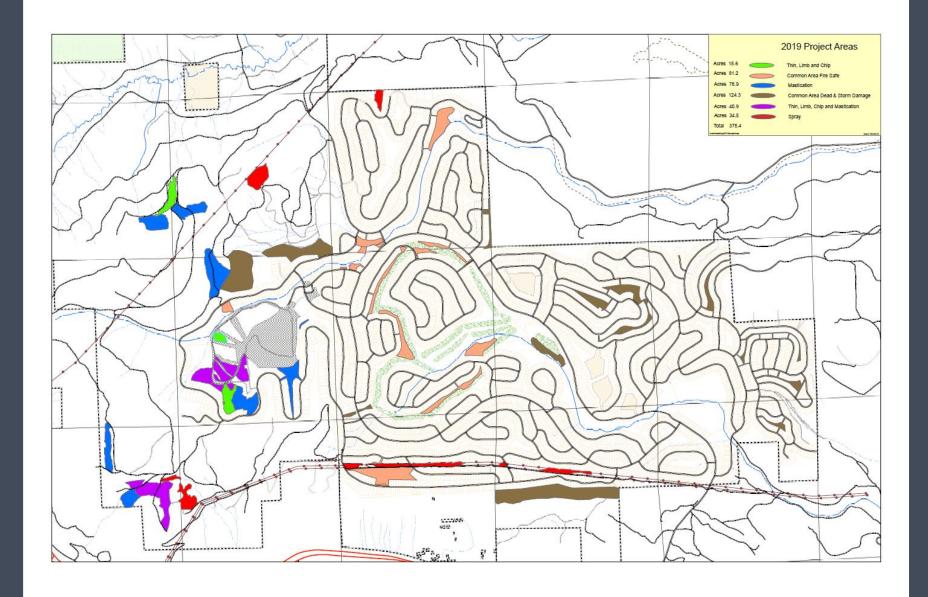

Acres Treated 2012 - 2018

YEAR	PROPERTY TYPE	ACRES TRE	ATED REM	MARKS
2013	Common area Plantation/FB	12.8 186.7	* South Skislope Way Fuel Break acres 86.4 acres assisted by two g additional funds approved by the	grants and \$28,000 in
2014	Common area Plantation/FB	8.5 82.8	Forestry reduction due to poor w trees on the rise in common area	
2015	Common area Plantation/FB	116.2 34.7	Very dry year – little mastication Removed 641 dead trees from the	n due to fire danger. e property.
2016	Common area Plantation/FB	73·9 ^{143·5*}	Contract labor costs doubled as a per/hour rate to a per/acre rate. a grant. Removed 577 dead trees.	*104.8 acres assisted by
2017	Common area Plantation/FB	90.8 84.7*	Board of Directors approved \$150 funds, \$62,710 to storm damage a * 26 acres assisted by two grants.	and common area work.
2018	Common area Plantation/FB	84.1 143.8*		3,929 in additional funds for storm rea work. *103 acres assisted by two

Targets set in the 5-year plan - 100.2 acres of common area and 75 acres of fuel break management/year.

Drought Caused Mortality

2015	641 trees
2016	577 trees
2017	593 trees
2018	1116 trees
2019 YTD	407 trees

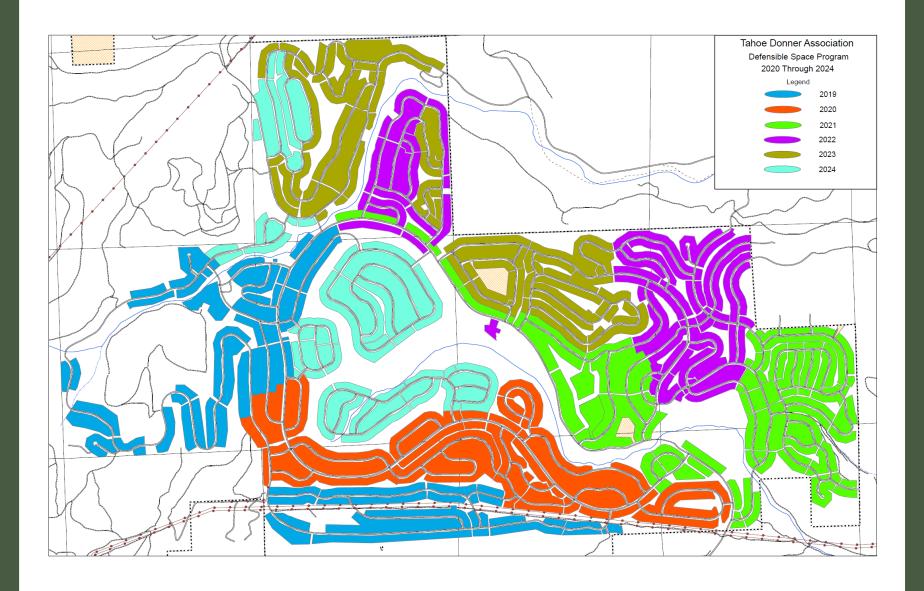

Even after the two wet winters, forest pest management specialists agree that we will continue to see higher than normal tree mortality due to bark beetle activity.

Winter 2016/2017 Storm Damage

Entering the third season of a predicted 3-year cleanup program

2018 Defensible Space Program Update

All of Unit 3 and portion of Unit 5. Skislope Way, Snowpeak/Slalom area, and Copenhagen area.

Inspected 984 properties – 59 passed / 925 failed
